Human Rights. YES! is a new human rights education curriculum on the rights of persons with disabilities, currently in development by experts in the fields of disability rights, international human rights law, human rights education and grassroots advocacy. The manual-style teaching tool applies an active learning approach and is intended to serve as a major resource for human rights advocates and rights-based development practitioners in their human rights education, advocacy strengthening, and other programmes. Human Rights. YES! draws on the full body of international human rights law and policy, with a strong focus on the newly adopted UN Convention on the Rights of Persons with Disabilities. It will be published in hard copy and made available as a free online resource, with official versions in English, French, Spanish and Arabic. Other translations may be undertaken by advocates who wish to have this manual in their own languages.

Table of Contents
